

Cloud Power Measuring Instrument

Feature of Product

- 1. Online Monitoring: V, I, P, Q, S, PF, kWh, THD, Demand, Curve Analysis
- 2. Remote Monitoring: Monitor electricity information through mobile device APP
- 3. Instant Alarming: Set alarming value to demand, harmonic etc. data. Through APP and Email to get precisely monitoring.
- 4. Data Storage: Online FTP server for history data, up to 1 min 1 record for analysis

Clear and simple interface

Device Description

- 1. Adopt high strength anti-crash box
- 2. Easy to carry with safety lock hole
- 3. Water and dust proof design

Erhernet Socket

- 1. Light to use, replace traditional CT
- 2. Simple to install, save time and cost
- 3. Wide range current measurement
- 4. Low lose, not interfered by DC current

- 1. No Power Supply Require
- 2. USB data record
- 3. WiFi or Ethernet available
- 4. No need fixed IP

Equipment Specifications

Cloud Power Measuring Diagram

- 1. 160 x 160 LCD display
- 2. 4GB memory
- 3. Data logging recorder within 1min ~ 60 mins
- 4. USB flash disk. Auto download record data when USB inserted.
- 5. THD 2~31th for V and I
- 6. System voltage rapid up and down detection
- 7. Event recorder power outage/ restore
- 8. High accuracy class: V & I are 0.2%
- 9. Wide range power supply: 80 ~ 480 VAC
- 10. Overload or low load alarm
- 11. Rogowski coil CT

Recorders comparison:

	NEMIE	Other Brands
Electricity Monitor	Local and APP monitor	Local
Alarming Signal	All figures could set APP and Email alarm	None
Data Storage	USB+FTP Server	SD Card
Data Analysis	APP and software analysis	Software analysis
